CONTENTS TO VOLUME 12

PART 1 JANUARY 1962

The three-dimensional nature of boundary-layer instability. By P. S. KLEBANOFF, K. D. TIDSTROM and L. M. SARGENT *page* 1

Effect of finite boundaries on the Stokes resistance of an arbitrary particle. By HOWARD BRENNER 35

On the theory of the wind-driven ocean circulation. By G. F. CARRIER and A. R. ROBINSON 49

The structure of a hydromagnetic front in a cold collision-free plasma. By P. G. SAFFMAN 81

Particle motions in sheared suspensions. XIII. The spin and rotation of disks. By H. L. GOLDSMITH and S. G. MASON 88

The solitary wave on a stream with an arbitrary distribution of vorticity. By T. BROOKE BENJAMIN 97

The behaviour of a laminar compressible boundary layer near a point of zero skin-friction. By K. STEWARTSON 117

An almost-inviscid geostrophic flow. By L. M. HOCKING 129

Mass, momentum and energy flux in water waves. By G. B. WHITHAM 135

Unsteady, viscous, circular flow. Part 2. The cylinder of finite radius. By MERWIN SIBULKIN 148

REVIEWS

Einführung in die theoretische Gasdynamik 159

Hydrodynamics: a Study in Logic, Fact, and Similitude 160

PART 2 FEBRUARY 1962

Boundary-layer growth near a rear stagnation point. By IAN PROUDMAN and KATHLEEN JOHNSON 161

Hypersonic flows past a yawed circular cone and other pointed bodies. By H. K. CHENG 169

Stability of the parallel flow of a fluid over a slightly heavier fluid. By ROBIN E. ESCH 192

A theory of thin airfoils and slender bodies in fluids of finite electrical conductivity with aligned fields. By EDMUND C. LARY 209

Thin-airfoil theory applied to hydrofoils with a single finite cavity and arbitrary free-streamline detachment. By A. G. FABULA 227

Turbulence spectra from a tidal channel. By H. L. GRANT, R. W. STEWART and A. MOILLIET 241

Unsteady, viscous, circular flow. Part 3. Application to the Ranque–Hilsch vortex tube. By MERWIN SIBULKIN *page* 269

Collisionless expansion of gases into vacuum. By RODDAM NARASIMHA 294

The instability of an annular thread of fluid. By SIMON L. GOREN 309

REVIEWS

Tables for the Compressible Flow of Dry Air 320

PART 3 MARCH 1962

Resonant interactions between two trains of gravity waves. By M. S. LONGUET-HIGGINS 321

Phase velocity effects in tertiary wave interactions. By M. S. LONGUET-HIGGINS and O. M. PHILLIPS 333

The asymptotic form of the laminar boundary-layer mass-transfer rate for large interfacial velocities. By ANDREAS ACRIVOS 337

The shape and stability of a bubble at the axis of a rotating liquid. By D. K. ROSENTHAL 358

The supersonic and low-speed flows past circular cylinders of finite length supported at one end. By D. M. SYKES 367

The correction of hot-wire readings for proximity to a solid boundary. By J. A. B. WILLS 388

The barotropic stability of the mean winds in the atmosphere. By FRANK B. LIPPS 397

The initial motion of a gas bubble formed in an inviscid liquid. Part 1. The two-dimensional bubble. By J. K. WALTERS and J. F. DAVIDSON 408

Transport processes in a combustible turbulent boundary layer. By NORMAN G. KULGEIN 417

Note on the damping of free-surface oscillations due to drainage. By JOHN W. MILES 438

Radiative transfer effects in natural convection above fires. By M. P. MURGAI 441

Effect of thermal radiation on the propagation of plane acoustic waves. By WALTER G. VINCENTI and BARRETT S. BALDWIN, JR. 449

REVIEWS

Introduction to Mechanics of Continua 478

Boundary Layer Theory 480

PART 4 APRIL 1962

On the non-linear energy transfer in a gravity-wave spectrum. Part 1. General theory. By K. HASSELMANN *page* 481

Effects of slight nose bluntness and roughness on boundary-layer transition in supersonic flows. By J. LEITH POTTER and JACK D. WHITFIELD 501

The behaviour of a turbulent boundary layer near separation. By A. A. TOWNSEND 536

Stability of the compressible laminar boundary layer. By LESTER LEES and ELI RESHOTKO 555

Slow viscous motion round a cylinder in a simple shear. By F. P. BRETHERTON 591

Hypersonic flow over spiked cones. By C. J. WOOD 614

The boundary layer on a magnetized plate. By M. B. GLAUERT 625
